

Experienced Project Manager

We are looking for an apt addition to our team; someone who can manage thoughtful engineering work, delight clients and help forge our shared future.

Isherwood specializes in geotechnical engineering throughout Canada with offices based in the Toronto and Vancouver areas. Formed in 1972 by CSCE Fellow Brian Isherwood, Isherwood Geotechnical Engineers provides superior value to our clients rooted in a focus on personalized service, efficient and constructible solutions and high-quality design verification support in the field. We are a collegial organization with a focus on education and a unique culture that sees our members as people first and allows for open and honest communication.

Isherwood has grown to a staff of over fifty specialists in our various areas of interest. Our employees are passionate about what they do and dedicated to providing clients with top-tier service by contributing expertise from a variety of backgrounds and cultivating a teamwork-focused, hands-on approach to solving problems.

We are looking for an **Experienced Project Manager** who is open to discovering the unique way we do business, passionate about technical project management, and has the humility to jump into a new environment and learn. You are patient and unflappable, willing to work within a unique culture, able to coordinate internal resources without hierarchy, nimble, and able to work on multiple projects and with multiple clients at once. You have excellent communication skills – written, verbal, and non-verbal are essential. You will need to relate well to everyone involved on our jobs – on the construction sites, in the boardrooms, via videoconference, and around the kitchen table. You are down to earth and easy to be around with a sense of professionalism and a good sense of fun. You will learn and embrace our project management process from start to finish, love to delight clients, and yourself delight in keeping our budgets in the black. You take pleasure orchestrating and keeping the project team content and on track, able to deal with the interruptions of calls, emails, clients, and colleagues.

Qualifications

- You have at least 5 years or as much as a lifetime of experience in project management.
- You appreciate great design – solving puzzles captures your imagination.
- You are down to earth, versatile, practical, and a natural collaborator.
- You have excellent communications skills.
- You love giving good service.
- You are a ‘People Person,’ delighting in what can happen when trust and respect are revered.
- You have natural ease with problem solving and an optimistic outlook.
- You think working for a small, vibrant boutique engineering company sounds like tons of fun.

If you think we’re right for you, don’t let anything stop you from applying.
